GESMES, Message statistique générique (GESMES)

Rédaction : Pierre Attar

Recommandation(s) liée(s) : *SDMX*

« GESMES/TS uses the EDIFACT syntax (ISO 9735) and United Nations (UN/ECE) segment directories, both of which are international standards. EDIFACT messages can sometimes look syntactically complex. However, GESMES/TS has been designed so that its syntactic structure is simple, being predefined and frozen; its flexibility derives exclusively from the power of its underlying data model.

GESMES/TS is maintained by the SDMX initiative led by seven international and European organisations (BIS, ECB, Eurostat, IMF, OECD, UN, World Bank). »
